

In the claims: Amend claim 1, as follows:

1. (Twice amended) The combination of a [A] foodstuff and a holding device that produces different effects based upon manipulation thereof, said holding device comprising: a rigid housing assembly having a means for holding foodstuff[:] and a foodstuff member removably secured to said rigid housing[;] , said rigid housing assembly including output means for producing at least one effect of the group consisting of sound, light, movement, vibration, electrical stimulation or odor generation, [said output means being supported by said housing assembly;] a power supply for energizing said output means, said power supply being electrically coupled to said output means; and a control means for regulating said output means for altering said at least one effect [of said group consisting of sound, light, movement, vibration, electrical stimulation or odor generation] of said output means by physical interaction with said foodstuff member [holding devices] wherein said foodstuff member [holding device produces] causes corresponding changes in said effect [at least one of said group consisting of sound, light, movement, vibration, electrical stimulation or odor generation].

REMARKS

The examiner's requirement that the table be removed from the drawings has been complied with and the table is now in the specification.
